## NAYA RAIPUR A NEW AGE TOWN

On November 1, 2000, Chhattisgarh – the 28th state of the Union of India – came into existence after the division of Madhya Pradesh. Among the prime, respect and slow development of the region, former Prime Minister Atal Bihari Vajpayee decided to create the new state of Chhattisgarh. On 1st Nov 2000, all the Chhattisgarh had seen unexplored reserves, an undiminished local population, a low birth and mortality concern. The birth of Chhattisgarh made the experience that another backward, underdeveloped and gloomy region would now get recognition on the map of India. In the last 14 years of its existence, the state has been able to create a sound economy based on an agricultural sector which has shown impressive growth as well as industrial production owing to thermal power plants. Chhattisgarh has been consistently ranked among top 3 investment destinations in the country since 2006. The state of

Chhattisgarh has a robust economy which has witnessed a double digit growth for eleven straight years since 2006.

Among the many successful policies and development projects, one of the most ambitious ventures by the state government is Naya Raipur, Chhattisgarh's new capital city which was inaugurated as a state first ever integrated township in January 2017.

It came to the world of the various industrial units, namely, the Bhilai, Raipur, Durg, Jagdalpur and Bhilai which made the state one of the leading producers of steel, iron, aluminium, cement, engineering products, minerals, fertilizers and blended grains of the country.

It is also by these efforts that the state has made great strides in industrial production and is pushing much above its weight when it comes to contribution to the national economy.
